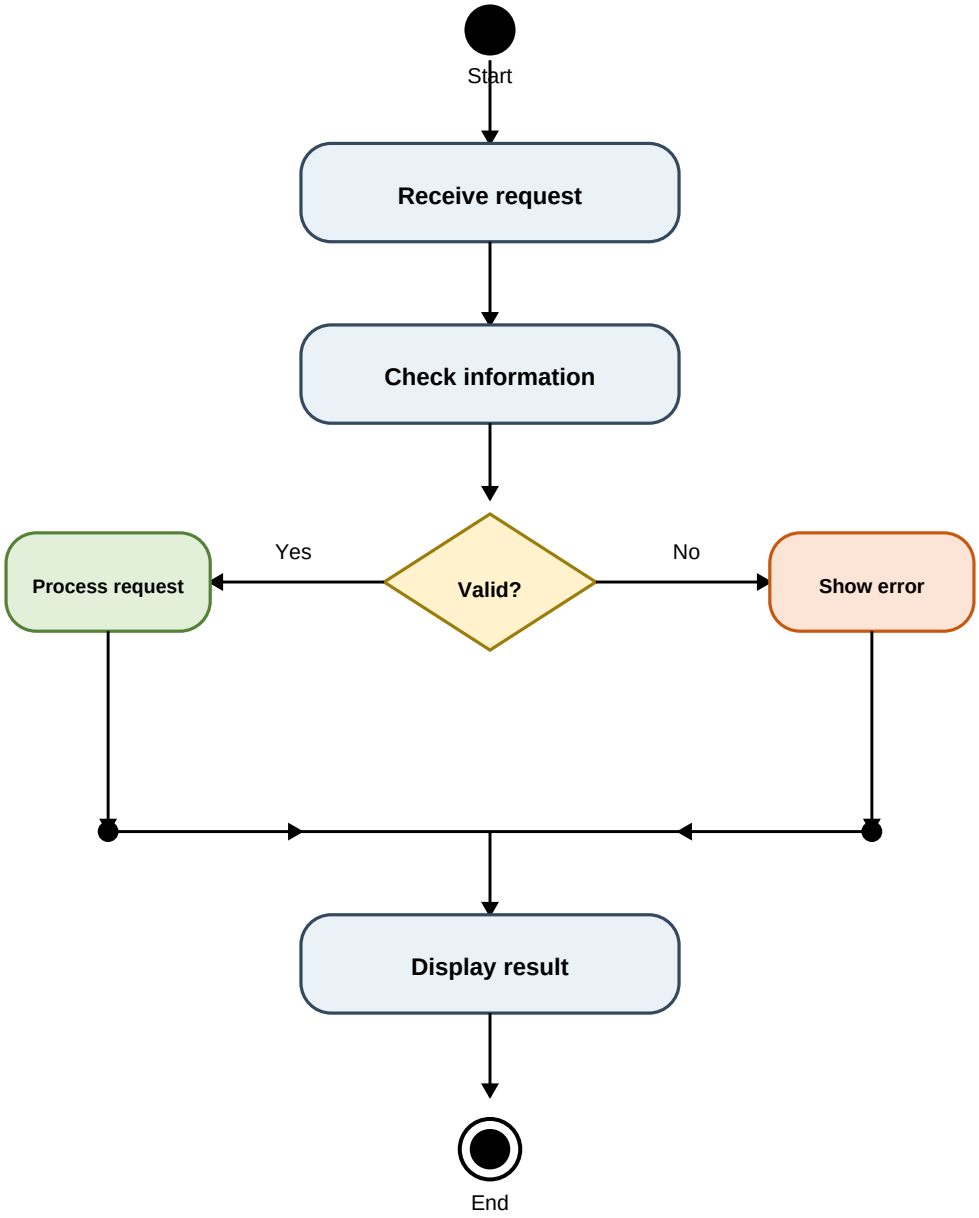
LAB 4: DRAW THE ACTIVITY DIAGRAM

UML Activity Diagram — Illustrative Example

Objective: To represent the flow of activities in a process using UML activity-diagram symbols.

Note: The prompt only provides the lab title and does not specify a system or scenario. The diagram below is a generic example showing a request-validation workflow. Replace the activity labels if your teacher assigned a particular use case.



Symbols used: Filled circle = Start; rounded rectangle = Activity; diamond = Decision; bull's-eye circle = End; arrows = Control flow.
